ENJOY . . .

. . . A VACATION AWAY FROM CROWDS

An ideal and easy way to enjoy the scenic beauty of the mountains is on horseback. It's a lot of fun — far easier than you may think. Unlimited miles of trails wind through shady forest, mountain meadow, flowering slopes, by streams, lakes and waterfalls. Riding a good western saddle on a well-trained horse is not at all difficult. Folks who have never ridden before soon find it is not only easy and safe but also turns out to be the big thrill of their trip.

You will find Golden, Rainbow and Eastern Brook trout in the mountain streams and lakes. There is fishing to please the novice and to challenge the expert. Then in the Fall you will find hunting and fly fishing at their best.

SPOT TRIPS

On a spot trip you furnish all your own equipment and food — the pack outfit is just a means of transportation. You will mount your horse for your ride in; while your camping gear, food and extra camp comforts are packed on mules. You will be guided to a campsite on the edge of a lake, in a meadow or perhaps at a bend of the stream. After unloading the mules, your packer and stock return to the pack station as you get organized for your stay. On longer spot trips, the packer will stay with you overnight, returning to his headquarters the following day. On a predetermimned date, the packer will return to take you and your gear back. When the packer and the stock return for you on that stipulated date, that will be the end of your Sierra holiday. The economical spot trip is the most popular type of trip.

HOW MUCH DOES IT COST?

There is a pack trip to fit your family budget. For example, a spot trip for a stay of a week or ten days for a family of 4 would be approximately $125.00. Write for specific rates for your vacation.

PACKAGE RATE (Round Trip) Spot Pack Trip
